Re We'd like to make a stones drive onto the block

Dear Hayley,

We would like to tip stones to form a wet weather access to the house in River Rd Millgrove. Its course would not cover any easement or required drainage.

I do need to know what size crushed rock to use, I was imaging 40mm but maybe bigger is needed.

I'll await your advice and go-ahead. Refer to map below.

We are very pleased with the house as its shaping up and turning out, and are happy to showcase it as a Clark home.

Do you have an estimate of how long until the house is ready for presenting for its Certificate of Occupancy, so we can press our drainage contractor to complete his task on time?

Thanks, yours sincerely,

Harry N. Malcolm
